PRAGATHI KANALA

Email: pragathi258@gmail.com | **Mobile:**+1 762 699 4762 | **LinkedIn:** http://linkedin.com/in/k-pragathi258/

SKILLS:

Programming Languages: C, C++, Python, Java, Spring.

Web Services & Integration: RESTful APIs, Java microservices, JSON-based configuration/metadata-driven UIs, Apache Kafka.

Web Technologies: jQuery, Node.js.

Databases: MySQL.

Cloud & DevOps: AWS (EC2, S3, IAM, Lambda, RDS, VPC), Kubernetes (EKS, ECS), Docker, AWS CLI, CI/CD (CodePipeline, CodeDeploy).

Version Control & Collaboration: Git, Bitbucket, JIRA, Agile/Scrum.

Operating Systems: Linux, Windows.

Cyber Security: Privileged Account Management, Identity & Access Management.

UI/UX & Frontend: Lit Web Components, React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, responsive web design, accessibility-minded design, Figma handoff.

WORK EXPERIENCE:

Temenos USA Inc. – Software Engineer | July 2025 – Present

Project Overview:

- Build enterprise UI screens for an internal banking/customer-service platform using Lit Web Components, JavaScript, and TypeScript.
- Develop metadata-driven pages where layouts, fields, and flows are driven by backend configuration instead of hardcoded screens.
- Create responsive, accessibility-focused interfaces that adapt to different regions, products, currencies, and languages.
- Contribute to a modular user-agent framework that supports multiple service actions and customer journeys.
- Ensure all UI work aligns with the organization's internal design system, UX guidelines, and standard user-agent layouts.

Key Responsibilities:

- Own end-to-end development of new service actions, from reviewing Figma/requirements to wiring APIs and handling error/edge states.
- Build reusable, configurable UI components (tables, filters, dialogs, forms) reused across multiple workflows and products.
- Implement metadata-driven behaviors such as conditional fields, step-based flows, and auto-rendered sections.
- Collaborate with UX designers, business analysts, and backend engineers to validate flows and improve usability.
- Debug and resolve complex UI/UX issues across browsers and devices while delivering code through Git/Bitbucket, feature branches, and reviews.

Mphasis Limited – Software Engineer | September 2021 – July 2023

Project Overview:

- Developed a secure, high-performance banking platform integrating backend and frontend using Java, MySQL, HTML, CSS, and JavaScript.
- Built custom models and SAR (Suspicious Activity Report) forms to meet strict regulatory compliance.
- Contributed to RCT (Risk Management and Compliance Technology) for enterprise-wide risk detection and reporting.
- Implemented Actimize AML-SAM for anti-money laundering (AML) and suspicious activity detection.
- Worked with AIS (Actimize Integrated Surveillance) and RCM (Risk Case Manager) to manage alerts and follow-up actions.
- Utilized Actimize Customer Due Diligence (CDD) for risk-based AML compliance and customer lifecycle management.
- Ensured end-to-end risk management, focusing on customer impact minimization and compliance through dynamic, risk-based processes.

Key Responsibilities:

- Developed customized solutions on the Actimize platform using Actimize Risk Case Manager, AIS Modeler, Java, HTML, CSS, JavaScript, and MySQL.
- Created and enhanced RCM and AIS objects to meet client-specific requirements, boosting platform functionality and usability.
- Actively contributed to project planning, milestone management, and continuous skill development, ensuring timely and efficient delivery.
- Conducted strategic analysis of client data, crafting precise specifications and tailored solutions for improved risk management and compliance.
- Recognized for proactive project management and innovative problem-solving, significantly enhancing user satisfaction and operational efficiency.

PROJECTS:

Recipe Finder – Full-Stack Web Application

Technologies and Tools Used: React.js, Node.js, Express, MongoDB, Mongoose, JavaScript, CSS, HTML5, AWS EC2.

- Built a MERN (React, Node.js, Express, MongoDB) recipe app with search, favorites, responsive UI, deployed on AWS EC2.

Handwritten Digit Recognition using Convolutional Neural Networks

Technologies and Tools Used: Python, TensorFlow, Keras, CNN, NumPy, OpenCV, Jupyter Notebook, Tkinter, Matplotlib.

- Built a TensorFlow/Keras CNN for real-time handwritten '9' recognition using the MNIST dataset.

Development of a Flutter-Based Agriculture Management Application

Technologies and Tools Used: Flutter, Dart, TensorFlow Lite, LGBM Classifier.

- Built DigiFarmer, a Flutter app using TFLite & LightGBM for crop disease, weather, and market insights.

EDUCATION:

Master of Science in Computer Science: ***3.60/4.0 GPA, May 2025***

Florida Institute of Technology, Melbourne, Florida, United States

Relevant Coursework: Computer Information Security, Database Management, Computer Vision, Artificial Intelligence

Bachelor of Engineering in Electronics & Communication: ***7.8/10 CGPA, August 2021***

PES Institute of Technology, Bangalore, Karnataka, India

Relevant Coursework: Programming in C and Data Structures, Analog Electronics, Digital Electronics, Network Analysis

CERTIFICATIONS:

- **Cloud Fundamentals, AWS Cloud Content Management, Apache Kafka** – Certification & hands-on labs (Mphasis Limited).
- **RESTful Web Services, Java Microservices, Git, DevOps Essentials** – Certification & practical training (Mphasis Limited).
- **Programming for Everybody (Getting Started with Python)** – University of Michigan, Coursera.
- **Privileged Account (Access) Management (PAM)** – Udemy.

ACHIEVEMENTS:

- Awarded first place in the 'Legal Literacy and Awareness Quiz' by NA Global Law School.
- Received Distinction from the Department of Electronics and Communication during bachelor's program.
- Recognized as Outstanding Student of the Year (2025) by the Department of Computer Science during master's program.
